ABSTRACT

Although fiscal year 1981 was a time of uncertainty for the Appalachian Regional Commission (ARC), Congress did appropriate $218.2 million for the highway program and $87 million for area development, research and local development districts (LDDs), and administrative costs. Coupled with other federal funds and funds from state and local sources, ARC expended $551.3 million in fiscal 1981. In addition to the highway program, programs continued in health, child development, vocational and other education, community development, energy and enterprise development, environment and natural resources, other programs and special demonstrations, housing, LDD planning and administration, and research and technical assistance. Supplemental grant funds were utilized according to priorities set by the Appalachian states; the share of education projects dropped from an earlier 57% to somewhat more than 7% in 1980 and 1981. Text and tables present an overview of ARC activities cumulatively from 1965 in the first part of the report. The next part provides maps, county population change data, program categories, amounts, and sources of funding for each of the 13 Appalachian states. A directory lists LDD addresses and a map pinpoints their locations. (BRR)

March 31, 1982

The President
The White House
Washington, D. C.

Dear Mr. President:

Pursuant to Section 304 of the Appalachian Regional Development Act of 1965, we respectfully submit to you for transmittal to the Congress a report on the activities carried on under this Act during Fiscal Year 1982.

The report outlines the work of the Appalachian Regional Commission with the thirteen states that make up the Appalachian Region.

Respectfully yours,

ALBERT P. SMITH, JR.
Federal Cochairman

JOHN Y. BROWN, JR.
Governor of Kentucky
States' Cochairman

What Is Appalachia?

Appalachia, as defined in the legislation from which the Appalachian Regional Commission derives its authority, is a 195,000-square-mile region that follows the spine of the Appalachian Mountains from southern New York to northern Mississippi. It includes all of West Virginia and parts of twelve other states: Alabama, Georgia, Kentucky, Maryland, Mississippi, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee and Virginia.

Foreword

Fiscal year 1981 was one of uncertainty for the Appalachian Regional Commission.

In February 1981 the Administration proposed that ARC be terminated at the conclusion of fiscal year 1981, with no funds appropriated for fiscal year 1982. It further proposed that $110 million of ARC nonhighway funds for fiscal 1981 be rescinded and the ARC highway program be transferred to the Department of Transportation, with funding to come out of the highway trust fund.

Concerned about the damage that an abrupt termination of ARC activities would cause in Appalachian communities, the Appalachian governors passed a resolution urging that funding for ARC highway and nonhighway programs be continued in fiscal 1982 at a level representing a fair share of federal budget cuts and that ARC fiscal 1981 funds not be rescinded.

Responding to the governors' position, Congress reduced the rescission of ARC's 1981 nonhighway funds to $40 million and deferred $15 million to fiscal 1982.

The level of funding for the Appalachian Regional Commission for fiscal year 1982 was set by Congress at $100 million for highway programs and $50 million for nonhighway programs.

Congress also asked ARC to prepare a report including a plan for completion of the Appalachian Development Highway System, recommendations for a three-to-five-year ARC area development (nonhighway) finish-up program and an analysis of the potential for exporting Appalachian coal. The Appalachian governors delivered this report to Congress on December 31, 1981.

Finances

In the 17 years the Appalachian Regional Commission has been in existence, Congress has appropriated a total of $4.73 billion for the Appalachian program, through September 30, 1982 (see Table 1 at right). Of this total, $2.9 billion has been for the highway program and $1.8 billion for the nonhighway program.

* After rescission.

Authorizations and Appropriations

The federal share of ARC funding is provided by Congress in two stages, first authorizations and then appropriations, as is the case with most federal programs. Authorizations establish both the scope of program activities and the maximum limits on amounts that may be made available to carry out these programs. For the Appalachian program, authorizations of funds for the nonhighway portion of the program have been provided for two-year periods, and for the highway program for longer periods, usually four to five years.

Within the ceilings established by the authorizations, Congress then provides annual appropriations for the Appalachian program, generally not for the full amounts authorized.

Highway Funds

The original amount authorized for the ARC highway program in 1965 was $840 million and covered a six-year period, to 1971 (see Table 2 on page 4). Since that time Congress has raised the total authorization to $3.2 billion through 1982 as more miles have been added to the system and as the costs of construction have risen with inflation. Neither the original authorization nor the increased funding, however, would be enough to complete the system. The total amount actually appropriated to date for highways, through fiscal 1982, is $2.9 billion.

Nonhighway Funds

Appalachian nonhighway funds have been used for a number of programs, including health, vocational and other education, mine area restoration, housing, water and sewer treatment, other community facilities, land stabilization, timber development, support of the multicounty local development districts (LDDs), research and supplemental grants. Originally, these funds were allocated to each state in a specific amount for each program then in existence. In 1971, Congress changed this system of authorization by allocating the nonhighway funds as a block. In response to this Congressional action, which gave the Commission greater flexibility in investing its funds according to individual state priorities, the Commission designed a new allocation

Table 2
Appalachian Highway Authorizations
(in millions of dollars)

Appalachian Legislation	Period Covered		Amount of Authorization Added	Amount of Authorization Cumulative
1965 Act	through	1971	$840.0	$ 840.0
1967 Amendments	through	1971	175.0	1,015.0
1969 Amendments	through	1973	150.0	1,165.0
1971 Amendments	through	1978	925.0	2,090.0
1975 Amendments	through	1981	840.0	2,930.0
1980 Amendments	through	1982	260.0	3,190.0

Cumulative authorization through 1982, $3,190 million.
Cumulative appropriation through 1982, $2,887.6 million.

system under which each state was given a single allocation, called an area development allocation, for four major programs: health and child development, vocational education, mine area reclamation and supplemental grants. Each state could determine how much of its area development allocation it wanted to use for each of these programs.

Since 1975, this single allocation system has expanded to cover all ARC nonhighway programs, except for Commission research and evaluation and the support of the LDDs.

The area development appropriation is divided among the states according to a formula that takes into account the land area, the population and the per capita income of the Appalachian portion of each state.

Sources of Funding

The commitment of the federal-state partners to the ARC process is demonstrated by the fact that the responsibility for funding is shared just as the decision-making process is. Appalachian and other federal funds have made up 60.8 percent of the total costs of all Appalachian projects (62.3 percent of highway projects and 59.6 percent of nonhighway projects—see Table 3 on page 5). The remainder of the costs has been paid by state, local and/or private funds, so that the federal government on the one hand and state, local and private funds on the other have invested close to equally in the program.

Over the years, the federal share of funding for grant-in-aid projects has been increased by legislation, and this increase is reflected in the Appalachian program. During the initial years, the federal share of the ARC highway program was slightly over 50 percent, but rose to 72.9 percent in fiscal 1981. The federal share of the nonhighway funding has also risen over the years, although not so steeply—from an original share of about 50 percent to 57.4 percent in fiscal 1981.

Supplemental Grants

Because of their rural character, their relative poverty and their low tax bases, many Appalachian states and communities found it difficult to come up with the matching share required by law in many programs before federal funds can be granted. Although they were eligible in all other ways for grants for the construction of basic public facilities, before the existence of ARC they often could not take advantage of a number of federal programs.

In response to this problem, Congress designed a unique feature of the Appalachian legislation, the supplemental grant program. Under this program, the federal share in grant programs may be raised (from the usual 30 to

*Ineligible costs of projects, which are not eligible for matching federal grants, must be borne by the applicants.

66 percent) to as much as 80 percent of the cost of construction, so that the state or community can participate by putting up as little as 20 percent as its matching share. The Appalachian states have used supplemental grants to construct many types of public facilities, including vocational education schools, colleges, health facilities, water systems, sewage treatment plants, recreational facilities, libraries and airports.

Each year the Commission utilizes supplemental grants funds in a slightly different manner, in accordance with priorities determined at the time by the Appalachian states (see Table 4 on page 6). The proportion used for water, sewer and sewage treatment facilities, which previously amounted to about 20 percent of these funds, rose steadily—from 38 percent in fiscal year 1973 to nearly 70 percent in fiscal year 1978—and then dropped to 58 percent by 1980 and to 52 percent in 1981. In 1981, industrial site development and community improvement utilized 33 percent of these funds, as compared to 21 percent in 1979 and 24 percent in 1980.

Health facilities, on the other hand, which once accounted for about 26 percent of these funds, utilized about 17 percent in 1975 and dropped to less than 2 percent in 1980 and less than 1 percent in 1981. The share of education projects has dropped from an earlier 57 percent to somewhat more than 7 percent in 1980 and 1981.

It should be noted, however, that these amounts do not reflect completely the amounts of ARC funds used for construction of health and vocational education facilities since these may also be funded under ARC's basic health and vocational education programs.
